

Create and Innovate with U.S. Embassy New Delhi!

Project Title	Create and Innovate with U.S. Embassy New Delhi!
Project Summary	Join the Community Liaison Office to support one of the largest embassies in the world! Seeking passionate intern to update, design, and edit website content.
Country	India

Project Description

The U.S. Embassy New Delhi has a large and lively community, which includes U.S. officers, military personal, family members, and local staff. The Community Liaison Office (CLO) serves a key function at post and provides a wide range of services including welcome and orientation, cultural activities, crisis management, management of the Global Employment Initiative, among others. The main project would be to update and create new, user friendly content for an existing, outdated CLO website. This website has potential to improve the way that embassy employees and their family members receive a vast amount of information, in one place. This internship offers a great opportunity to learn about the operation of a large Embassy, while providing support to the U.S. officers and family members in our community.
